WANT A NEUTRAL ZONE FOR THE NATIONS OF AMERICA

NO ONE WANTS TO ADOPT MOOSE AS A PARTY ANNEX

WASHINGTON, Dec. 2.—Proposals for creating a neutral zone in the waters of the western hemisphere and conserving the right of neutrals will be laid by the United States before the governing board of the pan-American union, which consists of the diplomatic representatives of twenty-one American republics.

The board meets Tuesday for the purpose of reaching a concord of views on neutrality, perhaps so the twenty-one republics may speak as one voice to the belligerent powers whenever questions arise.

FINANCING THE WAR EXPLAINS STRENGTH OF GREAT BRITAIN

STOCKHOLM, Dec. 2.—The Svenska Dagbladet publishes a report by Professor Gustav Cassel, a national authority on "Financing the War." He says in part:

"Those countries which are big creditors of the neutrals have naturally a special strength in war time, in that maturing liabilities are readily taken up. This is most distinctly seen in the case of England, which under normal circumstances invests between \$50,000,000 and \$75,000,000 per month abroad, this being the normal form for the application of the surplus of England's balance against foreign countries. Should England now, as might be the case, cease to make these investments the corresponding amount would stand at her monthly disposal."

"This explains the excellent financial strength of England just now. England is the capitalist par excellence who can live on the returns of her capital, and who, thanks to her resources, can force the whole world to contribute towards her war expenditure."

TERRITORIALS ARE NOW SHOWING UP BY THOUSANDS

BEING MOVED UP TO THE RESERVE LINE BEFORE GOING TO FRONT.

HAVRE, Dec. 2.—During the last week colonial and territorial troops have been arriving from England by the thousands. A part of Kitchener's new army is expected soon, and the huts and floored tents now being erected in the outskirts of Havre are said to be for its reception.

The best trained territorial troops, which have been over here long enough to be somewhat acclimated and broken into the ways of the country, are already being moved into the first line of battle.

The soldiers in the British expeditionary force are kept under iron discipline in one respect, and those who become unfit for duty through their own fault are sent back to England in disgrace.

If officers violate Kitchener's orders it means cashiering.

Tommy Atkins has nothing but praise for the English people. Some troops marched past the market place in Havre the other day, according to an American there at the time, and the old fruit women held out their baskets for the soldiers to help themselves. This meant a great sacrifice to them, for their earnings are a matter of a few pennies, and they gave away their stock.

TIME WILL COME LATER WHEN THEY WILL BE IN RECEPTIVE MOOD.

WASHINGTON, Dec. 2.—Henry White, ex-ambassador to France recently returned from Germany, discussed the European situation with the president.

"Europe is not ready for peace," said Mr. White. "There is not the slightest chance now of getting a hearing for a suggestion of peace. That time will come later, and then it will be time for the United States to act."

SOFIA, Bulgaria, Dec. 2.—The situation in Serbia is critical, according to reports. The Serbian army has been withdrawn from Belgrade and telegraphic communication with Belgrade and Nich, the present capital, is interrupted.

LONDON, Dec. 2.—Heavy fighting has been resumed in the region of Argonne, but French and German reports disagree. The French assert the Germans are repulsed, and the allies say they have progressed. Infantry fighting is resumed in Belgium. German attacks on entrenchments were beaten back, and the Germans suffered heavily.

CANCER CONTROL URGED UPON THE AMERICAN WORLD

EDUCATIONAL CAMPAIGN NEEDED TO GRAPPLE WITH DISEASE.

JACKSONVILLE, Fla., Dec. 2.—The importance of a nation-wide educational campaign for the control of cancer was emphasized by Frederick L. Hoffman, in an address before the American Public Health association here today. The subject of his address was "The Accuracy of American Cancer Mortality Statistics." Mr. Hoffman said:

"The truly enormous recorded increase in the cancer death rate during the last twenty-five years, compared with the previous quarter century, absolutely precludes the possibility of this increase being exclusively the result of improved methods of medical diagnosis and death certification."

"The burden of proof that cancer is not on the increase rests with those who make the assertion that the increase in the recorded cancer death rate is exclusively the result of improved methods of diagnosis and death certification. The required evidence in support of this argument has not been forthcoming."

"In contrast, the statistical evidence of cancer increase throughout the civilized world is so overwhelming and so obviously conclusive, and so thoroughly in accordance with medical and surgical experience, that perhaps no other fact in the vast domain of human mortality and disease is more completely established at the present time. It is therefore a right of exercise of the critical method of reasoning that public attention should be directed to what is obviously a serious menace to civilization and the importance of cancer control on the basis of a nation-wide educational campaign."
